

# Universe State

## Universe State

We have never clarified whether the universe had created by big bang or "intention."

However, many global scientist advocates:

"A purpose of the universe" by Dr. Einstein, "Baby universe" by Dr. Hawking, and "Something Great" by Dr. Kazuo Murakami who is known for the study of genomes.

If human bodies are little cosmos, there are universes to the number of human beings.

And then, the earth is a part of the universe.

We have savaged the mother earth for a long time.

We have hurt the earth and ourselves by each of war, ecocide, crime, starvation.

We do not stop.

We cannot stop.

It is about time for each little cosmos, human beings in the macrocosm to unite.

The aggregation, the huge universe is named Universe State.

Each of us has belief independently.

We are the party that has projects and network to lead Japan and the world to peace.

Our job description is diverse such as doctors, executives, professors, homemakers, students, and artists.

We think earnestly with a little playful mind in our free time with leading our businesslike lives.

We have already understood.

If nothing should be is done, the earth's future will be dark and not be inherited to the next generation steadily.

"We have already understood."

What world should we aim at? — It is difficult for people in the world to agree mutually and live happily without wars, starvations and ecocides.

If we should not start...

It is now that we must unite to the origin of the universe.

As the only "nation" in the universe.

## Preface

Significance and a purpose to live are for everybody to live peacefully and happily. If it easily says, it is to "live as a human being" in the ideal society.

In the good old days in Japan, the spirit of mutual help traditionally existed. Neighbors and relatives lived like brothers, sisters and a family harmoniously. For instance, we borrowed it from a neighbor when we ran out of soy sauce and miso and those were returned with a bit of gratitude. Taste and humanness existed in society at the time. Because a difference of poverty and wealth was little, even lockup was needless. A relationship of a spirit existed between people those days.

Ideal society is the goal where every nation and religion aims. Circumstances of a spirit of a human touch overflowing Japanese of good old days will become the starting point that we tie up between people, and create ideal society in the 21st century.

However, the westernization enabled modern Japanese to live in the environment that did not need human relations. When we run out of miso and soy sauce, we can buy them at an open-ended minisuper. If there is even money, everything is available anytime. That let a communication of people weaken. For self-defense, individual information an infringement and the conservation of privacy became important. In a condominium leaving the only neighbor and approximately dozen ofcm, we are dependent on the security system and live with unknown people without conversation.

The neighbor who was as a family member, brothers or sisters are now treated as stranger. People become possible to live not to look back upon bothering anyone else. Thus we can live indifferently in spite of faced with the following things: The natural global warming and environmental disruption to threaten life, increase of an endangered species of the animals and plants, war and plunder, increase of crime, existence of a nuclear power and the proliferation of nuclear weapons, starvation and poverty, illness and suicide, industrial waste and illegality abandonment of trash or child abuse.

Because it is expected that the phenomenon will increasingly worsen in future as well as not converge, we will not be able to live on happiness for the time being.

Will we have lost the spirit that lived as a human? — Though those are unrelated for us, we will be forced to enter war as a soldier if a country makes war, we will have to work extra if a tax rises, we will suffer from illness if the global environment worsens, and we cannot but commit suicide if we lose its job.

Will you be left with other people's affairs really? Even if only our family, friend and we want to be doing in an emergency, you must receive unfortunate fate with people of the others.

Time is already late. Are you good as it is really?

People of profession called a minister hold an ideal and a dream and will work hard for that realization day and night. However, they are ridiculed. For instance, class disruption, political corruption, a scandal of a police officer, medical devastation, or greed bonze. Reality goes quite opposite to an ideal, a dream and hope.

People know the good and evil and, needless to say, know what an ideal is. However, the question why society does not improve continues existing.

## **I . The apple box that an apple rots**

A difference with the ideal social structure that an ideal and a dream is realized and the modern social structure that an ideal and a dream is not done has to be investigated to solve those questions.

It makes understanding of that easy to compare apples and an apple box with social structure. We can understand that a person replaces an apple easily.

On the other hand, a metaphor of an apple box may be complicated. However, plainly, it is a constitution element of society, hardware. It consists of five items:

Economic system — circumstances of distribution, way of distribution and consumption

Industrial structure — circumstances of manufacturing

Finance — circumstances of the circulation, assets and property

Taxation system — circumstances of public money, intended purpose of money that we levied from people

Besides, there are following four items as software — politics, education, information and religion. They exist to create, maintain and administer the apple box.

There is a problem that modern social structure, the apple box, will rot whole apples. (Adjective social structure) Even the superior apples-ministers or scholars, fresh apples — children, and improved apples — enlightened people, If they abandon the judgment of good and evil and are content with their current situation, all apples rot finally.

Furthermore, the structure of a current apple box leads a tree of an apple, the earth, to rot as well as apples. In each social structure, capitalism cannot stop war, market economy cannot stop mass production and mass consumption, throwaway-based manufacturing cannot stop ecocide, and mammonism and the unfairness distribution of public money cannot stop morale contamination. Thus there is no methods to avoid rot of apples unless the apple box is reconstructed: for instance, polish (learning and training), an examination of management method (legal changes and thoroughness of manner), improvement (enlightenment activity), and ventilation of the box (environmental conservation, recycling, modification of labor conditions). In the worst case, apples are discarded for the apple box to endure; there is stark reality of downsizing; Symptoms are masked by restructure and personnel reduction. (Band-Aid resolution)

Those methods have been continued repeatedly, but society does not improve and becomes rather bad. The reason is nothing but that the apple box has not reconstructed. It is a pressing need to create ideal society as a substitute for capitalism, market economy, the industrial structure of the manufacturing center, mammonism thought and the taxation system that are the basic structure of the present apple box. (① resolution of material problem)

Furthermore, there is another question. Though people understand that they must create ideal society, why was the social structure that cannot achieve an ideal one established?

A clue to solve this question is to find an answer to a question "Who am I".

Therefore, we must search for an answer to the question, "What am I?", "Where am I from", "How should I live and what should I aim?" by concentrating all wisdom

of the human. We must decide an ideal method of politics, education, information and religion based on that. (② resolution of a mental problem)

Reasonable technique a victim and a pain do not occur, and smooth method of reconstructing the apple box is expected to solve above-mentioned two problems, and to make ideal society.

First, a blueprint of an apple box must be shown. Then, It must be shown that what the next principle of capitalism will be, what the next economic system of market economy will be, how money system and taxation system will be changed and how politics, education, information, religion to manage those should be changed.

In addition, as well as a theory and suggestion, the model community with watching and experience should be built. Because that will eliminate our uneasiness for the new apple box. (Grand design and final vision must be shown first.)

In the history, the reconstruction of an apple box was apt to be accompanied with a pain and bloodshed such as a revolution or war. However, today it is the 21st century, and we, who live in high-civilized societies, can share mass information instantly all over the world. Thus considering the historical backdrop, an apple box must be reconstructed by a refined method to be different from that.

In the next section, ideal vision about principles of the next generation, economic structure, industrial structure, a system of money and a tax, politics, education, information and religion are suggested.

## **II. Symbionism**

### **— freely fair principles of symbiosis —**

In the capitalism society, struggle cannot become extinct so that there is plunder to a base. Some characteristics in capitalism — greediness for earning more capital and sense of a special privilege by capital strength, can promote discrimination. (Superiority-oriented system — valued on industry, economy and management) No matter how much used sophistry, finally, ultimate unequal society will come. A disagreement of idea with someone else causes a violent scramble. Therefore, struggle does not die out eternally. That is, so to say, the imperialism.

Capitalism is located in opposite poles of our ideal that there is not war, and the people who are poor by poverty, starvation and illness are relieved immediately and are everyone fairness as a person. Thus, the continuation of capitalism society

cannot make ideal society. (Why the educational expenses, medical cost and welfare costs will be reduced) Therefore, it is the principle of symbiosis that is suggested as ideal principles of the next generation as a substitute for that.

Symbionism is pacifism.

That respects individual freedom by sharing in the inside to preserve order and work and responsibility with law and, by common use of right and disclosure of information, creates society with stable life activity fairly and freely. (The society dependent on livelihood, medical care, the welfare, education, and togetherness) There are no ruling classes, the class system, permanent manufacturing, and forced labor to get money in symbionism. Thus, it is quite different from communism. A theme of symbionism is how pleasantly we live as a human with cooperation under fairness.

### **III. Education and religion are foundations to live as a human**

There is much education and are many religions in the world.

However, there will not be so many an ultimate aim and goals of education and religion. It is an ultimate aim and goal of education and religions create the following ideal society, and to live there. (Truth is one only)

A theory of education and a doctrine of religion are foundations to realize ideal society. Practice especially is important in religion: Praying for happiness of people of the whole world, learning the habit that a rule is right like worship, a thing making use of in health maintenance as breathing method and exercise method through manners.

However, strangely we are in great fear by discrepancy of interpretation as well as society still does not improve. The reason is that social structure, the apple box prevents from being practiced because even if education and a doctrine are however ideal, and excellent.

What brings our happiness cannot be maintained without defeating its competitor such as securing profit, publicity, and supremacy. Thus if social structure is not reconstructed, it will not be realized in spite of brilliant idealistic theory.

Besides, it is very difficult that an organization and a religious association reconstruct it. Thus, our idea should be fused in a big frame of ideal society that can "live as a human." without constrained by sect and religion.

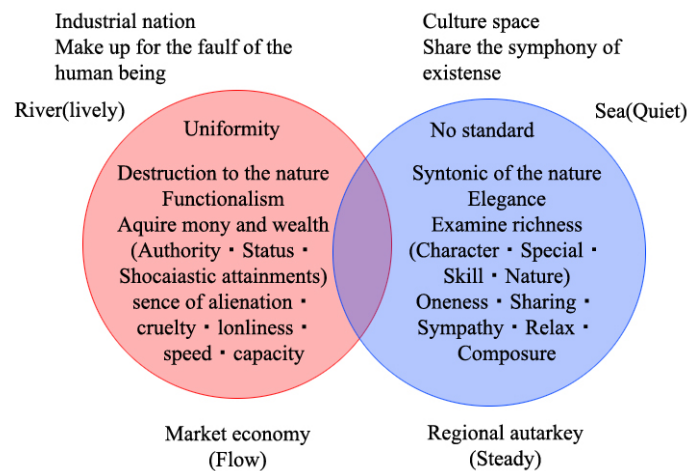

In recent years, the number of NPO has increased very much. Every group to including them should assess which part can they have some role in reconstruction, convene a summit with each part, pursue the essence, and show the standard of

ideal society.

#### IV. Regional autarky

Market economy can survive only by continuing mass production and mass consumption. That shows that market economy is a destructive system that cannot avoid global warming and the environmental disruption. Thus, it is indispensable to shift to the ideal economic system that is suitable for the 21st century to make restraint of global warming, an improvement of the natural environment, and environmental safeguard possible.

At first, not to overwhelm the Spacecraft Earth sink, economy of the next generation as a substitute for market economy is expected. They require a following thing minimally:

- (i). "The recycling-oriented agriculture, forestry and fisheries industry" aimed for environmental conservation and prevention of the mass infection in stockbreeding and poultry farming not the emphasis of productive efficiency.
- (ii). The method not to require the exchanges of supplies with distance as commodity distribution to protect the global environment permanently.
- (iii). Permanent sharing of the manufacture which personal taste is not included, and was manufactured the only necessary quantity without continuing mass production and mass consumption eternally.
- (iv). The idea that was based on "the complete cycle" that is neither recycling of an unenduring product nor disposable. (Abolition of the harmful material for ecosystem and the human body)
- (v). The complete supply and demand of comfortable and safe creature comforts

such as clothes whose functionality valued, organic food, dwelling that constructed by chemically inert building materials and is fireproof and shockproof, and complete demand and supply of water and energy such as utilizing heated water and electricity. (Sharing of object and a right)

- (vi). Economy that assures the stress-free and serene life with enough is enough leave by work-sharing and without imposition of working and child-care

Briefly speaking, necessity or not of civilization is distinguished to a base in sharing of object, and it is necessary, and the object that it is necessary superior in the durability is produced, and the above is to establish community comprising the economic system which we are harmless, and do the supply and demand by stockbroker production and stockbroker consumption and voluntary trade by safe food, clothing and shelter and energy (The fusion of Jomon culture and modern civilization) That is called regional autarky. (A social system for labor with a little operation population)

## **V. Order society**

People thinking that everything is a matter of scythe. On the other hand, for us, a lack of money makes both life and recreation impossible. People develop a strong tendency to get money beyond their conscience, for instance, thievery, blackmail, delicate, and insurance killing even for relatives. The people came to regard money as important than life obviously.

The increase of mammonists, who does everything for money, caused moral degeneration as a pilot of Spacecraft Earth (earthians). Because that is from the devastation of a spirit of people that a problem of money and taxation system caused, ideal money and taxation system must be reconsidered immediately.

It is necessary for the starting point of living to be asked to normalize the spirit of a person. This needs a very drastic idea. We must reconsider the essence of money and tax after the life space that even no money and a tax enable living is established, and having returned to the starting point of living.

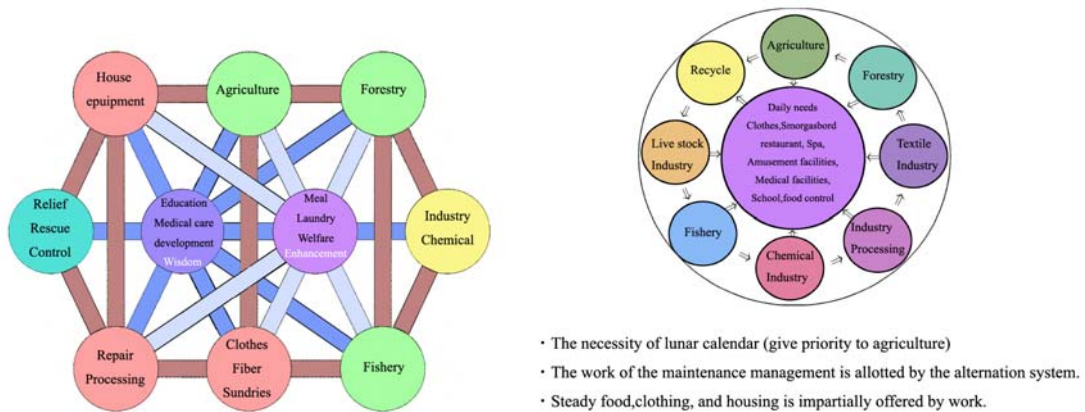

At first, it is necessary to make a special life area making living by labor instead of money in the new place. Then, after having considered a quantity of self-sufficiency rate and supply, it is required to divide them into some areas: agricultural commodity, machine production, clothing production, ceramics production. Food, clothing and shelter are secured by we select a type of industry by our own fitness, and sharing specified work and responsibility.

Products are collected in the center of community, and charged and managed, and

public accommodation is set up so that meal, clothing and daily necessities can be provided to anyone anytime. In addition, a house of suitable size is prepared individually. They are equipped with furniture with the durability and a cooking appliance or an electrification product by convenience already.

Thus, the establishment of a system based on sharing makes it possible that anyone lives in a house fairly. We can make living by the labor that oneself selected instead of money. (A working passes system)

That prevents mental suppression, stress caused by working beyond our ability and unsuitable job. Moreover, illness is prevented by depending on fresh and safer foodstuff produced locally. (Ultimate preventive medicine)

A mindless job is work for a robot and a computer. We should do the productive work adapted to each of us. It provides enough leisure with us as a rotation with them to share responsibility and a job fairly.

Moreover, eco-tour should be executed because our spirits will be purified, hearts will be healed, and the living environment that we can feel happiness live as a human will be created through living, enjoying in nature. (A clean apple box is created)

We will understand that we can live without money by living in that livelihood sphere. Moreover, through an experience of necessity of environment conservation and practice of life that made much of human relations, we will realize that harmony is the noblest materially and mentally.

That society is named order society after perspective on the dignity of not money but life. (Self-realization is realized and fixes peacefully living environment) Some drastic methods to disprove the stereotype that we cannot live without money must be executed to realize above. Our spirit will never be recovered unless those are done.

## **VI. Maintenance-based autonomous industrial structure**

Industrial structure depending on manufacturing eternally will have ruined the global environment before long. Considering maintenance and recurrence of the natural environment, the industrial structure that does not depend on manufacturing is required.

At first, you must get away from material civilization to escape from permanent manufacturing. Therefore, a production of necessities must be necessity maximum. The necessity maximum means the quantity needed that all people can share, quantity of just enough possession derived from the utilization factor that anyone can use without inconvenience. It is required that functionality, the durability, convenience and sensuousness count than individual taste, and a design is refined on necessities. After necessities are manufactured necessity minimum, we must change it into the system that is based on management and maintenance. That means maintenance, examination, management and administration of manufactures in each community.

By transformation from manufacture to maintenance, management and administration, society should be switched over to the industrial structure that do not depend on manufacturing and every should maintains, administrates, and manages manufactures. Such a system utilizing products for a long term by the maximum maintenance check and management is called maintenance-based autonomous industrial structure.

It is necessary to consider the following two things to realize it.

From the diversity of our taste, each taste and manufacturing for a use is irrationalistic in a point of environmental protection. Everything bores people and a people end their life someday. Thus, manufacturing for only an individual produces waste.

It is said that a human being can think altruistically only after satisfied, but we must notice that our desire is unlimited. Because the modern society is market economy based on individual consumption, products are manufactured in sequence for people not to be bored. Therefore, people cannot think altruistically yet. (Structure to corrupt spirit)

Therefore, we must build the system transcended from tenacity and persistence for a material through switch to the ultimate manufacturing eyed sharing.

For instance, a traffic system in community should be constructed like this — Eco cars are placed as a kind of a ubiquitous traffic network and drives automatically to a destination. It is based on an idea that traffic violation and an

accident should be prevented by automation with a computer and a robot assuming it being impossible to have everyone observe law. (The systematization of the law) Cars are manufactured the necessity maximum derived from the maximum utilization factor. We lay emphasis on maintenance and management after that. To that end, it is sufficient to continue the maintenance and producing component needed.

That means departure from endless manufacturing. It will become possible to stop ecocide by only that.

When new community based on the maintenance-based autonomous industrial structure is created, current and the best technology will be required. The ultimate manufacture that each proud and weak point is supplemented mutually is required for each industry. In addition, considering the ability to regenerate of the earth, it is desirable to keep a burden for the earth by new manufacturing within a minimum after this reconstruction.

An improvement method of living the environment that depended on machines such as a water purifier or an air cleaner rather contributes ecocide by a supply, assembling of materials, production, and the transportation of a machine. If nothing is done, global environment must be ruined.

Anyone can understand the necessity of recovery of the global environment and activation of biological purification. However, it cannot be still constructed the ideal natural environment because that is against market economy based on mass production and mass consumption and manufacturing-centered industrial structure. Because there is the economic structure and industrial structure in which we cannot stop what is not good for environment, apples of the apple box rot.

About medical care, it is a goal to establish the social environment that does not need a medical act as much as possible. However, though instrument, knowledge and technology about medical care make a rapid progress in reality, the number of patients and medical cost is increasing more and more, a reason for the contradiction is similar to the environmental problem mentioned above.

Thus, if we make an effort to solve it in the current economic system, unemployment or closedown is inevitable for us. Because of the contradiction, it is never possible for us to say a right thing and to carry it out. (A problem of a system)

This is another instance. — Nobody thinks a nuclear weapon to be good. However, people manufacturing nuclear weapons have a family and a child. It is easy to object to a nuclear weapon, but it is difficult to consider it to the life security of people manufacturing nuclear weapons. For instance, alternative job and

livelihood sphere must be offered to do that.

Production cut and production stoppage are impossible as long as there are market economy based on mass production and mass consumption as well as it is not possible to throw weapons away as long as there is society requiring them. Therefore, such a society cannot conserve the natural environment.

Thus, a switchover to the world that can reach the essence such as a suggestion of the ideal method of the society that does not require a weapon, that does not have a war and suggestion of the alternate economy system that it can conserve the nature environment through restraint of production will solve a problem fundamentally. (Our lives need not choplogic but real intention.)

On the other hand, a civilized country having overabounded medical facilities and doctor must make an effort to the fundamental solution by creating the environment that can concentrate on a main profession quickly without looking away from essence.

However, because of the contradiction, we must not do that in modern society. There is the only way to terminate old society by degrees through creation of ideal society to a new area and emigration there.

When children waited for at a red light watched adult whom a signal is ignored as if it is said that the knack is prerogative of an adult, and cross it in the neighbor, children are to witness an essence of modern education. (As for the adult, rule violation is overlooked?) An adult can do feigning oneself and compromise, but that is unbearable for an adolescent and a child having a pure spirit. A spirit knows everything.

When is the environment where is not satisfied with even if healed no matter how completely reconstructed? The fundamental resolution about NEET — Not in Employment, Education or Training — , part-time jobber and parasite single will not be resolved unless the world that is full of contradiction not to have both a dream and the true intention is reconstructed.

Therefore, the suggestion of community including the new principles, economic system and industrial structure, which were completely different from the existing principles, economy, money and taxation system and the establishment to a new place of that, are indispensable to achieve the above-mentioned condition.

It will offer a little perplexity and relief to us that ideal social structure and a system, a theory to finally establish is shown, and are actually built to a new place as a model community. In addition, each industry is isolated from a current economic system. That allows that we work genuinely, and the community, which

can devote ourselves to a primary job, will be established.

When we think about the reform of social structure based on the result of these, it is no wonder that there is an alternative that realizes of the economic society based on "LOHAS — Lifestyles Of Health And Sustainability," and which can be sustainable allowed for health and global environment through construction of "Uni-Earth City," which is the community based on symbionism and has the ideal society and living environment that needs not money and taxation system.

## **VII. Education — the upbringing of a spirit**

The education of practical science to have three main points called New3S is necessary to learn skill to live in Uni-Earth City. (The wisdom is to make use for a person and we do not give priority in the competition of quantity of knowledge: Uni-Earth education)

- (i). "System" — the construction of a system perpetuating stable support and maintenance of civilization, the establishment of a system managing ideal society and systematization of politics.
- (ii). "Science" — scientific power to achieve high civilization and to maintain it permanently, ultimate scientific power
- (iii). "Sense" — exhibition of talent ahead of the human intelligence that each prepared for, operation to true vocation

It is an ideal that places lifelong learning by experience in fundamentals from an infant to the old. A kinder-elder-garten is established to inherit the exhibition of the creativeness and tradition of wisdom to a child from the old in the infancy, and the environment that both a child and the old can learn from through game should be set up there. That enables interpersonal communication to be practiced in life, and establishes the basis that grows the mind that we respect the old and can communicate with everyone. It is meaning of preschool education to have the way of life as a person is taught, and acquire courtesy such as consideration, gratitude, a mind of service and manner.

In an elementary school, students learn basic literacy and numeracy skills and right wording by a lesson. As well as development of physical strength and health enhancement, open-air learning is held by touching it naturally so that they experience a relation with ecosystem. In addition, emotion upbringing by music or art is also held. It is the purpose of elementary school education to bring up as the person who is helpful for other people and other creatures, to cultivate sensitivity, and to acquire loyalty.

It is aimed at grasping talent through using period to choose the type of job of each and searching for each true vocation through experience learning and inspection and learning the basic knowledge of management of the pivot and support of regional autarky and maintenance-based autonomous industrial structure in a junior high school.

In a high school, students choose a suitable job, and acquire technical knowledge of it. In addition, they acquire basic medicine and knowledge of a diagnosis to learn higher healthy maintenance and management, and secure the living environment, which does not require medical acts as much as possible. The term is a period realizing the ultimate of study, and there is a senior high school for exhibition of talent and realization of social contribution.

At a university, students enrich high-dimensional naturally environmental maintenance and management of health by useful invention for society, the improvement of computers and robots managed in each area and selective breeding of farm products. That promotes an indispensable exhibition of the creativeness to maintain high civilization.

We labor from 20 years old for 60 years old, only 40 years.

After that, A volunteer can flourish as tradition of wisdom in a kinder-elder-garten, small medium- and high-levels a part-time teacher of a school, developing guidance at a university, a member of a hobby club.

When we get impossible to work, we can use a substantial system such as patrol home care service by at-home or visit careworker. We can live in environment coherent to life security, education and care without depending on a pension throughout the life. (Existence value being helpful for a person)

It is an ideal that education is a development of ability consciousness for the free creativeness to be shown among the society fair materially and mentally and to learn to live art.

Creation and upbringing of Uni-Earth City are not the construction of a mere material utopia.

That is the making of system to bloom nature as a human, and to raise the mind nature. (Because an education system will not be changed in the society environment, it is done in a new area)

## **VIII. Politics — the systematization of politics**

A purpose of politics is people are treated fairly, and to create society without poverty. Thus if politics completely systematizes our life will be stable and have

permanence. To that end, politics need to shift the ideal management and administration system where certain individuals or companies cannot appropriate vested interest in the basis of equality and sharing.

This problem is very difficult for a large-scale nation at a point of systematization. Therefore, we will consider about community of a small model, Uni-Earth City.

In Uni-Earth City, a skill of a modern computer and robot is applied to a politics system (legislature, judicatory, and government) as the apple box that an apple does not rot. By protection by a law, monitor by all people, the accomplishment of an individual duty, ideal society will be possible to stabilize and be maintained permanently. For us, it is important that we acquire the political system as an obvious living system and the custom by experience through education since we were born. Furthermore, a ruler of the political system must not be established afterward. (Prevention of a selfhood act) Thus, the government of Uni-Earth City is the minimum, and it is the world where everyone is a politician.

If such a policy is adopted in modern Japan shifting to decentralization, golden life space will be created.

With the above how the future should have changed to normalize society has described.

There will be various opinions and impressions. However, the world cannot be changed essentially unless that is executed. Because there is the fundamental reason, why we cannot but create ideal society Uni-Earth City as a system. The reason is that significance and a purpose of living cannot be found unless the question that "who am I?" of the next clause is solved and significance and a purpose to live not to be achieved unless the society which conformed to the answer that "Who am I?" is created.

The structure is described in the next clause.

## **IX. "Who am I?"**

Though we can do the distinction of "good" and "evil," "good" cannot be considered to be "good." The answer is in "who am I?"

The question, "who I am" is often said philosophical or religious. However, we cannot avoid it when we think what is important to the best lifestyle and life. Because it is the most important theme in the fundamental construction of social structure.

In addition, in the modern and historical society, we can notice society made in defiance of it collapsing certainly. When the question "who am I?" is compared to

apples and an apple box, we can understand this: Then the question is equal to a question whether is good if what is an apple, who creates an apple and an apple box for what purpose, and how should be an apple and an apple box finally. Thus, a clue to solve the question is to articulate the apple, which created an apple box "somebody," Something Great with an apple.

The question, "Who am I?" seems to be insoluble, but it may be not. Have you ever thought about a necessity of a cookery program? The reason that cookery programs exist is that only the person who cooked can tell a recipe for that even any kind of menu. (Everything is creation — cooking, music and art.) If we can know materials and constitution of space and the world where we live in same as this, we can find who we are. Space, foodstuffs are made from "an object, tangible or immaterial materials and quantum" and "intention, a non-material or energy," which means recipes or creation ability, two elements. In addition, tools by which we know or tell recipes, "identifier," the general term of sign, letter, number, word, name and sign language, are required.

If either "object" or "identifier" did not exist, cookery program, scholarship, study and education would become impossible. That means that common recognition such as knowing it or telling becomes impossible. A recipe for cooking cannot be told, and it is not possible to origin to know the universe even if it exists, in addition. "Object" and "identifier" are indispensability materials to find a question, its answer and ask the following question: what kind of ability the creative ability is whether feelings and the good and evil are what kind of sense, thought or acts and who are we.

Thus, we need these: Embodiment, corporealization of creativity by substitution to materials, creation of "oneself," actor to recognize creatures, verification, the experience of the essence of creativity and creator by "object" and "identifier." "Object" and "identifier" are tools to experience and know everything. (Art to solve pivotal propositions by the whole field of science)

Therefore, a question "who am I?" appears and name sticks to oneself and even if that it is a human being is known no matter how. However, because origin of "object" and "identifier," in other words before the birth of the universe, "genesis" is not included in a category of "object" and "identifier," scholarship cannot arrive at truth such as real nature of oneself and genesis of the universe. Thus, there is not finally a method besides realization to know truth. Truth is a mystery, and we require flash and notice or awakening given by another person to realize it.

Anyway, the human knew that they were in a well expressed in the sign, a that made of "object" and "identifier." Because only people who created the well can

recognize that they lived there, it is proved that they created a well. This proof means, "Humans are residents in the well, the universe, and is the creator of the universe." We cannot live alone. We are organism creating the universe monolithically, human beings. (At first...)

## **X. Creative intention (set energy of life) produces everything**

By the quantum-mechanical experiment such as Delayed Choice Experiment of John Archibald Wheeler and The Quantum Consciousness Hypothesis of Roger Penrose and elucidation of a function by human body dissection, it begins to understand that a material changes a property (not ingredients but condition) by consciousness of people.

We cannot prescind quantum mechanics from our intention. Because the universe consists of a material that cannot but change by our collective intention even if the universe is immensity and infinity. When we overinterpret that, it is believed that the primordial phenomenon of birth of the universe, big bang or indeterminacy, is the creative intention, some kind of energy from the aggregation such as 己, 日, 8, and  $\infty$ , which consists of infinite energy of material and immaterial. (Japan, which gives the answer for the fountainhead of 日) Space consists of quantal blocks which are muddy and sandy and full of micro elementary particle and if they corporealize by the creative intention...We can consider that identities of ours are not in human bodies, materials.

The human body consists of a material, and they have limit. However, it exercises with the unbelievable ability because it is a material because it is influenced the intention of another person. Supernatural powers such as fluoroscopy or corporealization or unbelievable strength of fire ground are the examples.

In addition, an experiment to suggest a difference of "a human body"-- material and "oneself" — the energy body was carried out in Institute of Technology Natl. Inst. of Bioscience and Human-Technology of the Japanese Ministry of International Trade and Industry. According to the experiment, it was concluded that the mouse-injected anesthesia of fatal dose decreased its weight at most 200 $\mu$ g, and at least 7 $\mu$ g. Considering that with the Einstein equation, some "energetic material" can exist in the living body. About the human body, about the 40g weight decrease is also reported. Thus, some "energetic material" is existence itself of "oneself," and a difference of the weight can be considered to be a difference of the state that "an individual" was in the living body and the state that it is out of the living body. Thus, it is proper to think that the human body is a vehicle of "oneself."

The boarding procedure to the human body is denomination of "an energetic material" — oneself. It is transformed into a personal name (name = one) by denomination, and it is called a name repeatedly. Thereby, it is thought that Energetic material is transformed into voice, undulation, transcribed, penetrate or boarded into a brain of the human body. (One + self = oneself)

Thus if human beings are brought up by a wolf and a monkey, or only fed under home detention without hail because energetic material cannot penetrate into the body, they grow like a wolf and a monkey and cannot communicate with others. (The human experiment by Frederick II, in Italy, the 13th century, and Kamala and Amala in India, and Jenny in US)

In addition, because as well as a personal name, unlimited "energetic material" such as "a name of the gods and Buddha" and "something great", "a person" or "life" are named, a difference of oneself and someone else or a religion and denomination causes factional strife.

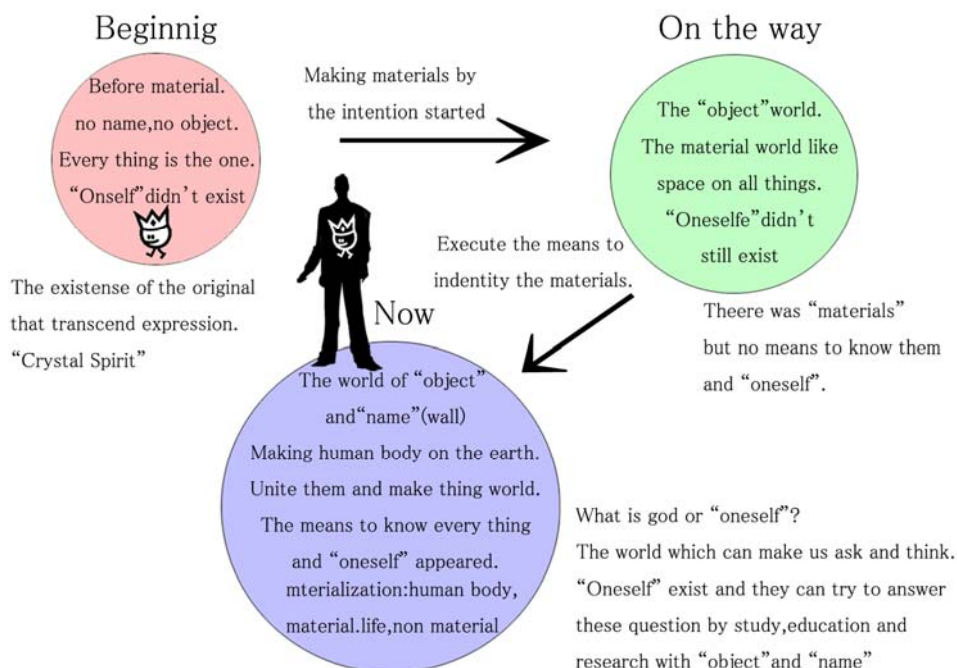

The root is one — one's existence, gods and Buddha and Something Great. However, the world is made us not to notice the illusion that there is in the state that an individual was divided. (The door of Iwato was closed) The above clarifies a difference of "the human body" and "oneself." It simplifies that near-death experience, the existence of a person telling memories of previous existence, multiple personality, astral projection and the drastic change of character and taste by an internal organ transplant are explained. ("Spirit" stays in the body.)

In Japanese, life[生命(seimei)] are expressed in two letters, [生(sei)] and [命(me)]. That suggests that life consists of two elements of [生] expressing a body and [命] expressing energetic material. The birth of [生(sei:inoti)], the human body is implantation of the fertilized ovum and sperm, then figuration of the body begins. On the other hand, the birth of [命(me:inoti)], oneself is implantation of the tied [命] and identifier to the brain, then autoplasty begins.

Thus, there are two kinds of death. One is death of "the human body – [生]," which is an object, and another is death of "oneself – [命]," which is energetic material. However, "the something great" that is the root of life is never dead. "[命] - energetic material" merely escapes from human body, and it is immortal forever.

Therefore, the beginning of the universe originates from the aggregation of whole energy, "human," "life," and "something great," which are essentially no different, the great fused consciousness which is the origin of the creation — the inclusive term of the fused consciousness is called Crystal Spirit, oneself. Crystal Spirit is in the body by what it bears the universe, creates the earth and human beings, and

name into our brain (transforms lives into names and decentralize them).

"Crystal Spirit" before the universe is created is primordial existence before there is a cycle of transmigration and the origin of the universe. According to "the Crystal Spirit," the universe exists in oneself. That is the state that the universe is corporealized in "Crystal Spirit," and float. In other words, the universe only exists in "Crystal Spirit and the universe is satisfied by all conditions and is closed system so that it can be completed. (The universe is "Crystal Spirit" itself) We cannot completely watch genesis of the universe "Crystal Spirit" itself is dispersed in the human body created in that by "identifier." The phenomenon must be based on locality and non-locality in quantum. (If they were not exist, quantum could not be formed)

In addition, cosmic constant, a numerical law exists in the universe. Therefore, it is thought that intention of some "Crystal Spirit" participates in the universe. Thus, it is hard to think that the universe is creature of chance. (Not apply only to the universe, everything having constant numerical law.) For instance, laws to be common between triplet of DNA and 三象 of divination)

"Number" is used for an intelligent design (ID) by all means. When it is planned to make object such as a building, a bridge, a tunnel, and chemicals, we make the mathematical expressions which "number" is always used such as blueprint and a chemical formula. It is the action that expresses intention to create by "identifier" and executes it. It is handling "identifier" including "a number" that only "Crystal

Spirit," which made cosmic constant and create the universe, possesses. Words, number, letter, sign, sign language is called "identifier."

Thus, unbelievably, genesis of the universe, intention for the universe to create it, Crystal Spirit, an intelligent designer exists dispersed in the human body. Therefore it is thought that a quantum reacts to even one only intention.

Identical person is called "自分(jibun)" in Japan, and it is written that "自(mizukara),"one was "分(wakareru)," divided. In other words, "oneself" suggests that it is outlier from "Crystal Spirit." On the other hand, we tell "our name" generally when it was asked our "名前(namae),"name, "前," before "名," identifier. However, that is incorrect. Because "前(mae)" means "the past," "Crystal Spirit" (the existence that cannot be expressed) is a correct answer of that.

Some of us may be disturbed understanding by the fused "human body" and oneself. Thus, we are "oneself,"  $\alpha$ , which is the patulous state free from any bind and one of the "Crystal Spirit," which energetic material is in the human body by denomination and surrounded in it. That is the answer of "who am I?"

The cycle that "Crystal Spirit  $\Omega$ " forms "oneself  $\alpha$ ," and return to "Crystal Spirit  $\Omega$ " again is called "infinite activity of life,  $\infty$ ." (Life and death and transmigration of a person) In fact "Crystal Spirit" itself which created the universe penetrates by "denomination" into the "human body," it has already become specific people when those noticed, and they are "human beings" because they are merely told that they are "human beings." (The principle of infestation is delusion.)

Because Crystal Spirit is neither specific people nor general "human beings," a question "who I am" arise. Besides, because this question is a question of "Crystal Spirit" itself not a question for an individual, that answer is not easily found. Visible evidence does not exist, and "Crystal Spirit" itself cannot be expressed. We cannot determine whether that exists or not because that cannot be expressed, and exists between "object" and "identifier." From the above, neither "the Crystal Spirit" nor the existence of "oneself" is material.

We can look at the human body consisting of 60,000,000,000,000 cells, but cannot look at one cell with the naked eye. We can look at each human body of about 6,000,000,000 in the world, but cannot look at our real true identity without figure with the naked eye. (The human body is reflected in a mirror, but oneself is not reflected) Thus the more we pursue the answer of "What is oneself?", the more we arrive at the religious, mystical, philosophical, and complicated world. (Occult)

We live on the premise that we exists today. However, we are originally one part of "Crystal Spirit" itself. Thus our life becomes full of a mystery, contradiction and

problems, and, as for us, we finally dead-end unless we live as "Crystal Spirit."

It is told "a human being" means "the world, the world" in a Japanese dictionary. We do not seem to be "human beings" apparently.

It is a duty of "Crystal Spirit" to create "the world and the world," a human being. That was based on the world of Crystal Spirit,  $\Omega$  -world, before beginning of the universe, and it was tried to create a "human being," the world and society. (The side to build social structure)

There is "ground zero" before "a material" and "identifier" — word, letter, number, sign, name. Because there is not the human body whom we see every day in "genesis of the universe" and "ground zero" - world of Crystal Spirit, that does not have physical features such as a color of eyes, a color of hair or a color of skin and a name. Thus, distinction and discrimination do not exist there. (The society fairness is natural = heaven = the original society) Distinction and discrimination is a method to hide one's existence drastically for the purpose of asking "What is Crystal Spirit?" and "What is oneself?", and the result of individuating by change of color, native language and figure.

Precisely because each of us is monolithically functioning "part of Crystal Spirit," we must create the society which can function monolithically, and live as "Crystal Spirit." That is a fundamental idea of a country created newly and the primordial reason why ideal society must be created. (We live together as Crystal Spirit) In other words it means that the world that treats all people as a slave if one is a slave and the world that treat all people as King if one is King are natural that all people are "a part of Crystal Spirit," oneself. (Human is the existence that has mind as Crystal Spirit and aims at completion as Crystal Spirit) True potentiality ability as "Crystal Spirit" is not to be exercised unless the whole recurs to "Crystal Spirit" even if only one returns to "Crystal Spirit."

A heart works continuously whereas hair seems to do nothing but be wind-blown in the human body. However, a hair takes an important role to excrete the heavy metal, which collected in the human body. Similarly, even a sluggard will get possible to take an important role -talent and destiny that each holds when the society which we can live freely, fairly, comfortably, healthy and integrally, Uni-Earth City are built.

As a fertilized egg construct a human body through cleavage to 60,000,000,000,000, unified "Crystal Spirit" forms the human society through cleaving to 60,000,000,000 people. The human body monolithically every cell and internal organs functioning whereas people act and function at will in the human

society. If the human body is compared to an individual, that means that a head, the body, a hand and a foot move ramblingly. Because an order of a brain, "Crystal Spirit" is not transmitted, they cannot understand how they should act. That is a state we are born, and to be dead without showing the important talent that each one takes. (A state we are dead after having been born before being born, and to be still dark)

Human beings have never considered the earth to be one unit, and realized ideal society, an ideal human being in historical times. We cannot arrive at a purpose and a goal to live unless the earth is reconstructed as the society where talent as "Crystal Spirit" can exercise. Therefore, we must create an ideal society, Uni-Earth City, and promote world unification.

## XI. "Oneself" + "ego" = "selfhood"

— If apples verminate by harmful insects, it becomes a wormy apples.

It was said "One who cannot be a human cannot be a cleric, either" well in old Japan. It is thought that "human" of that is "alias" of "Crystal Spirit."

Though we are noble existence to be everyone, each one who parted from Crystal Spirit, why do we create collapsing society, do we cause problems continuously, cannot we solve them?

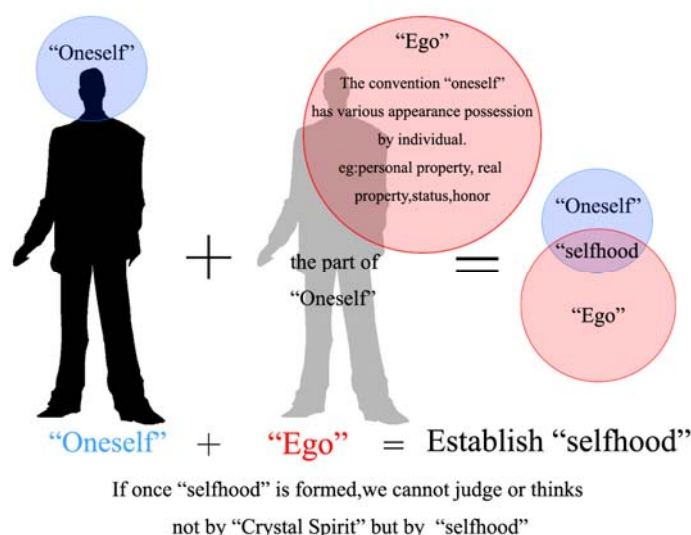

There is a clue solving the question for the building of "selfhood."

"Crystal Spirit," the core has two kinds of growth. One is growth of "human body," material and human body, and another is growth of "oneself," mind and a part of core. "Oneself" forms "ego," which is the orientation stakes-centered such as

profit-and-loss arithmetic by private ownership system in the processes. ("Crystal Spirit" equips inextricably linked bilateral character, adverse is "oneself," reverse is "ego")

For instance, we get angry when our car is injured as if oneself was injured. Though a car, materiality are merely object not oneself, by finding value equal to or more than oneself in it, in other words projecting "oneself" to object, "ego," which is another human being. It is thought that that causes the phenomenon that we get angry when a car is injured. Because a president - post, intangible assets identify with "oneself" in the case of the president in particular, it gets angrier by hurt of pride as the president, ego

"Ego" and "oneself" generated in that way fuse together to bring "selfhood" by fusing in the brain. Everyone completely forgets, in fact, to be "Crystal Spirit" (godlike being) today.

When "selfhood" is formed once, "selfish society," which is the social structure based on thinking and judgment led by "selfhood," are constructed. It is identity of "the apple box that an apple rots," and it is a cause for the society where we cannot but make an erroneous judgment and thinking. (egoism)

Though the struggle and the scramble were not our original purposes to live, we made the society that we cannot help scrambling and struggling.

Today we are "selfhood" formed by the fusion of "oneself" and "ego," "selfhood."

Therefore, we take ourselves to be named, and become "selfhood" by owning a house and a car. (though it is "alias) of French (Crystal Spirit," as for Kukai, all people show in "弁頭密二経論" unless it is noticed.) Kukai tells that we have not noticed yet though we are "Buddha," the alias of Crystal Spirit in

"Ben-kenmitu-nikyo-ron".

When "selfhood" is formed once, judgment of things and a criterion of perspective shift to selfhood-centered. For instance, wealth, fame, eminence, superiority and authority. They make us arrogantly, and have ourselves make the situation, a problem, contradiction or the mystery that cannot be solved with ourselves one after another. Furthermore, they have us segregate people, have us chuck others, and make the situation we cannot but perish someday.

Nevertheless, we are interested in recency, pursue daily pleasure, welter in unlimited desire, set struggle, disguise ourselves, and lapse self-contradiction.

On the other hand, the society itself is the environmental where we must continue to be "selfhood" even if we notice it, and make an effort to change "oneself."

Therefore, we must act evil despite having conscience, knowing justice, and having enough common sense. That is the reason why we have ever told a lie, said shenanigans, and deceived others at least once. ("Oneself" and "selfhood" are inextricably linked)

Thus, it is necessary to solve "selfhood" by all means to normalize this sleep-fogged state. For resolution of "selfhood," primordial materials and "ego" must be removed. That is the primordial ground and principle that the society must be reconstructed one based on detoxification of "sharing" - "ego" whatever reason there is. Thus, our mind cannot return to "Crystal Spirit," an original figure unless the nation that politics, economy, a law, education, money or the taxation system are developed and a function to remove "ego" is incorporated.

If the society remains the present state, ideal society will not realized because our spirit does not change. It means that we are absorbed in the creating of space comfortable for the harmful insect on an apple that modern society is selfhood-centered though the air space that is comfortable for an apple of the apple center must be made. Therefore, when a harmful insect grows up, and their numbers increase, the apple tree, the earth is also skeletonized then it will never fruit as well as apples will be eaten up.

It is necessary that the social structure restraining formation of "selfhood" that has never succeeded constructing since recorded history will be built and it will enables us to exercise our own talent and live as "Crystal Spirit" for the society not to be so.

"The selfhood" has significance in that it competes each other by being based on itself, promotes the radical civilization, and obtains advanced material civilization.

Thus, it is equal in becoming strong as "selfhood" to become the human being

whom it is annealed by competition and pass in the modern society. That makes it possible for us to succeed in the modern society.

However, because our origin is not "selfhood," then we cannot remain to live as "selfhood." Thus we will go to self-destruction, downfall.

Selfhood is expressed with "自我(jiga)" in a kanji. 我(ga) in it is the hieroglyph that the state that having a 戈(hoko) - pike in the hand is expressed. "Know thyself." is described in Parthenon shrine in Athen, which is ruin, and "Know yourself." is described in Peace Bell on the opposite bank of Atomic Bomb Dome in Hiroshima. That is surely a message from "Crystal Spirit" - the earth will lie in ruins unless "Who am I?" is solved and the society based on its answer.

It is for new apples, children to be thrown in the apple box that rots apples one after another that we neglect the "selfish society," the apple box that an apple rots. In that event, all apples will rot, and the apple box will be white-anted, and the apple will rot and be ruined before long.

From a long time ago, there had been traditional background that cooperativeness was emphasized, and avoidance of being egotistical like this proverb, "A tall tree catches much wind." in Japan. The growth of "selfhood" with development of civilization had been suppressed. However, we live as our "selfhood" dictate, and the dog-eat-dog society became taken for granted today. Briefly, we become to live based on "selfhood."

Naturally, it gets possible for everyone to understand easily that society will collapsed unless an effective countermeasure by fruitless war, snafu ecocide, and expansion of rich-poor gap by more spread "selfish society." Until today, we devoted to competition mainly on "selfhood." However, we should rebuild the social structure of "Crystal Spirit," develop our physical strength through discipline of mind and body by art of calligraphy, judo, kendo and karate, or avocation such as fine art and figurative arts, and develop our dignity through service and heartiness each other, then live as magnificent existence.

## **XII. New creation**

"Crystal Spirit" cannot be even named because of the existence before "identifier" and "object," but because we need its name to identify, it is named as "Crystal Spirit." However, "myself" is originally the most suitable name for "Crystal Spirit." "Myself" means the collective fused consciousness. Thus, nothing is to exist if there is not "myself." "Myself" means that it is fusion of much energetic material that is intention to create the universe.

We express "oneself" by expression of "myself" every day. Because "Crystal Spirit" hope us to realize that everyone is "myself," "Crystal Spirit" through "myself" is used by everyone. A mission of us to inherit the will is to create the society that neither discrimination nor distinction exists, and every "myself = Crystal Spirit" can live happily by sharing everything. (Society based on the answer of "Who am I?")

To that end, it is necessary to establish the society free from the brick wall - self-centered advantage, desire, wealth, use and word. It never deprives of freedom.

"Self-centered" means "wicked, cross-grained, and self-righteousness" in dictionaries. Thus, that requires merely us to refrain from self-centered view, selfish posture whatever doing.

There is a word "I [私]" in Japanese. The dictionary says that its' means is "Insincerity" and "Self-complacency" This suggests us that there is existence of "I", selfhood, which is insincerity and selfishness.

It seems quite painful and difficult to back to "Crystal Spirit" without using selfish "I" for each of us. "Selfhood" will not change any further as long as "selfhood" itself is thinking about change. Or "selfhood" may think itself "Crystal Spirit" in the worst case.

Therefore, we have to find the way to change everyone, not for individual.

It thought to be the best way for change to establish the environment based on sharing.

For instance, the relation of "oneself" and "Crystal Spirit" looks like a tadpole and a frog. A tadpole (oneself) cannot lives on land however large it becomes. Nevertheless, if tadpole changes to a frog (Crystal Spirit), it can live on land

The ideal for a frog is not living in water as a tadpole but living on land, that is, to be a frog. In a word, the completion of mental side (spirit) is the key to change the world.

In addition, the ideal world for a frog does not exist though it for a tadpole exists. (This world is a fake and only process.) Thus, it is the most important to make the world where a tadpole "I" is able to become a frog "Crystal Spirit".

A tadpole, "oneself", will be a frog," Crystal Spirit", someday without any training. The problem is that a frog does not be able to be a frog, "Crystal Spirit" if the time (season, age) has come because of the present social structure.

A tadpole becomes a frog whose looks and function are quite different from the original and whose way of growing is not same as a dog. In addition, "oneself" become "Crystal Spirit" which is different from the original though it is invisible.

The problem is that a tadpole becomes “selfhood”, fake frog that is neither a tadpole nor a frog if it is infected by a “ego” virus.

To solve this problem, the people who have become a frog (the person who can think not selfish) have to make the world where a tadpole is able to become a frog without pain.

I think the best way is making the world for a frog (the world of “Crystal Spirit” and awakening people that they are “Crystal Spirit”. This is the necessity to construct Uni • Earth City and Earth Confederation.

People who can understand the mission must have ability to renew the world and influence. For this reason, the society free from forming "selfhood" in which all people can realize to have been Crystal Spirit must be constructed by them.

If we can notice that we were originally "Crystal Spirit," our dull heart is whetted, our mind's eye are open, we can hear the voice of "Crystal Spirit," we can realize "Crystal Spirit," and anyone gets possible to realize truth, the origin of the universe and identity of ourselves. As a result, we can live as "Crystal Spirit," and enjoy conversation with words of "Crystal Spirit."

However, if that is not done, the cause that we repeat rise and fall of civilization remain not to be solved. Even if we move other planets or new world, "selfhood" will build a rotten apple box before long, and then apples will completely corrupt with the apple tree.

When we make community, we will be required special attention. If each community is created with a different system, especially, it expanded around the earth without standization of education, educational content and structure to eliminate "selfhood," ownership form, scramble and attacking will occur again. Thus when that is executed, it is required that the earth is considered as only one integrated unit and the social structure is united to be ideal.

It is now that the world should be reconstructed, and if we overlook the important time, the earth must go devastated with lost self-renewal capacity. (The arrival of the time when an apple rots)

A threat of annihilation by global ecocide is a huge issue. Thus, new society full-frills the system eliminating "ego" must be established with earth scale by considering the earth as unitary nation. It is the last chance for all people to be free from "selfhood" and become humans, "Crystal Spirit" that we construct the social structure which does not have us form "selfhood" based on "symbiotic society," "regional autarky," "independence maintenance management model social structure" and "moneyless life space." (It is hard for us to return to Crystal Spirit.)

If the earth gets impossible for us to live in, status, honor, money and wealth will not be worth at all. For this reason, the model of ideal Uni-Earth City should be constructed and we should ask people all over the world to understand through tour and experience by money of rich, wisdom of intellectuals, labor of stalwart.

In addition, the ideal model, Uni-Earth City functions as the poge area for public employees and a bureaucrat reduced by misgovernment, people struggling against hard living by a salary reduction, and unemployed people drained from competition society by "merger and acquisition." A revolution is accompanied with a victim and a suicide, but innovation is not accompanied with sacrifice. Thus, we should recognize that "revolution" giving merely pain without a bailout is not innovation enough. (Security of poge area)

It is not to say "better safe than sorry," but if building of Uni-Earth City begins until a nation has enough economics, the greatest public project imaginable will arise. (The last big business) Though that is just less than no time judging from historical time of the universe, all industry will be enriched, then Uni-Earth City will be finished up in happiness.

Because manufacturing switches to maintenance and management after completion of Uni-Earth City entirely, new manufacturing will be needless. Uni-Earth City will welcome everyone then.

A cause of current various problems are for us not to live as "Crystal Spirit." It is Uni-Earth City completing that we will be aware of "Crystal Spirit," and we will get possible to solve any problems by living as a person.

One part of "Crystal Spirit" which dispersed to an individual will not need to assert, call ourselves with "myself" abusively by life to share all materials and rights and will be able to link together with our spirit, Crystal Spirit. It will be not necessary to exist dispersed as "oneself" by unification, over a long time; we will be able to return to "Crystal Spirit," which can function monolithically. That will make new creation of the universe possible. Uni-Earth City will be built everywhere around the world, and the network of "Crystal Spirit" surround the earth. Our consciousness will matures from earth citizen into universe citizen, and from earth scale to universe scale (Universe State), and then the universe will get possible to be integrated as well as the earth by the conscious wrapping earth from the universe.

### **XIII. Making of Uni - Earth**

#### **— toward foundation of the Earth Confederation**

At first, it is necessary to make an ideal definition. For instance, the country which is sharing-based and peaceful, has no starvation, deprivation, disease, ecocide, conflict and crime, and whose living environment is systemized for people to live happily.

On the earth, because there are races that are different mutually in their life mode and thinking, it is smart to avoid touching on national, religious, and racial thought and disquisition and history.

Persistently, it is the purpose to decide standard of life civilization, systematized lifeline or infrastructure that laid emphasis on life maintenance to "live as a person," live in the earth.

In early stage, for instance, construction of theory for so-called ideal society is necessary. Ideal societies should be suggested as the ideal lifespace where material conditions are set based on the standard of civilization and improved individually-formed each climate. In addition, it is required that suggestion of standard of the social structure, ideal methods such as politics, economy, education, money, and taxation system that a nation, religion and race assume an ideal as mental setting of a condition.

In middle stage, it is necessary to actually make ideal society based on suggestion. Ideal society is established as model community, Uni-Earth City. Even if it is small, it is necessary for it to be dispatched that it is not merely a model to experience the idea, but an ideal society to the world. In particular, by that Uni-Earth City based on the suggestion is established as special living zone in Japan and people live there, practice of living as human being and an ideal method of ideal life space are appealed around the world.

If all over the world votes it the ideal society then, people will grow the common view and will be able to embody their conscious. (If we aim at a genuine ideal, it is the most effective to establish Uni-Earth City and to show an example there.

In addition, anyone can create Uni-Earth City anywhere. If that is realized, national borders will be vanish toward to integration for what humans aim materially, microcosm which is formed by cleavage in each brain (oneself and consciousness), which is compared to human microcosm in NHK Science Special, will be able to connected as a commonwealth (the network of Uni-Earth City, Universe State) in the large universe (togetherness as humans) beyond the small framework, the earth (nations, religions, races and consciousness). If we can have a

consciousness of the earth, a little planet in the universe through increasing each awareness from small dimension, the earth to big dimension, the universe, we become to think that we would like to live peacefully at least in the small earth. In addition, the criterion to think about things by improvement of consciousness level changes, and our consciousness switches drastically.

In last stage, a function of Uni-Earth City exercises with a special feature by magnifying Uni-Earth City around the world.

For instance, as part of the international supportive activities for some developing country, Democratic People's Republic of Korea, Islamic State of Afghanistan, Republic of Iraq, Islamic Republic of Pakistan, and African nations, it needs to establish Uni-Earth City suitable for location requirements under the global cooperation based on the experience and skills by JICA and UN-HABITAT as well as backup by money and supply, then genuine international contributions are required. (Education, scholarship, religion needs international cooperation = everything is harmonization and sympathy = syntony) Inhabitants themselves learn how to establish Uni-Earth City and to maintenance, management and administration of the system and self-sustaining by establishing ideal Uni-Earth City with a resident of the countries.

Then it is not necessary to scramble for support, and the living environment where there is really no starvation, poverty and discrimination is realized. That promotes fusion of a spirit. Against an old concept such as a nation, religion and the nation that were not able to realize an ideal until today, a new concept, principle of Uni-Earth City change a spirit of people, and an ideal can be realized.

Japanese, a Chinese, a Korean and the American race and nationality that are stereotype come to have no meaning simply because spirit of people changes. At that time, we will be able to understand the concept of a shift to Uni-Earth, Earth Confederation.

If a race, nationality, a border vanish, it becomes natural for us to be earthians. The earth becomes a unitary state then, there are not a difference and starvation, and we will change to the peaceful everyday life that a weapon is unnecessary. (A concrete method to abolish a border)

The armed forces of each country should shift to an international rescue team triggered by that. If they endeavor for security with earth scale for a disaster and an accident, the earth will become ideal world.

For this reason, standard of the clean, ecology and comfortable material civilization should be decided, for instance conformable house, water service, clean

lavatory, electricity service, traffic network. The earth must be considered to be integrated to one country, and sharing system must be enforced.

Furthermore, purification of a spirit is also necessary.

Our spirit will be integrated imperceptibly by Mind of sharing and living as a human is taught and education as an earthian is practiced it is important to offer education and information that everyone is a friend, and everyone is one as an earthian.

Because ideal nation and society should be established not forcibly by military power, authority, and violence but spontaneously by fusion of people. It is the most natural process, and that obeys a law of universe and nature. (Cooperation by Uni-Earth City)

When a new project is begun, an idea to avoid perplexity and misunderstanding of people is required. Therefore, at first, it is desirable to establish a model of ideal life space to be finally realized as Uni-Earth City, and to have them experience it. In addition, it is necessary to show an emigration plan to new life space definitely.

Thereby, the ideal will be realized by not power and military power, traditional approach, but fusion of a spirit in Uni-Earth City.

It is indispensable that superior model community, Uni-Earth City, a nucleus, a unit at the minimum of Universe State, which anyone cannot but accept as an ideal without resistance is suggested as grand design to establish Uni-Earth City, and to execute "a Making of Uni-Earth" project promoting fusion of earth scale. Because, Uni-Earth City must be the life space where scholarship is practiced as practical science and problems that modern society holds are entirely solved and an ultimate Utopia for each religion such as Promised Land, Elysium, the ultimate Islamic nations.

In addition, it is an ideal that Uni-Earth City is the life space that there is not ethnicity at all. Therefore, we should find more idealized and developmental alternative and improvement that is neither counterargument nor criticism through discussion by intellectuals, experts, and scholars. (Recruitment of the idea rich in specialty)

It is Japan that is the most adequate country to propose "Making of Uni-Earth." Because Japan can consider from any angle such as religion, weather, mental, thought, and material, and has most requirements to propose the thought for the weather for that diversity mentally materially, and the reason is that all most materials to propose shapes of ideal community. There are religions, politics, thoughts, houses, vehicles, food, clothes, climate from north, Hokkaido to south,

Okinawa, technologically rich companies and various letters such as kanji, alphabet, hiragana and katakana. Thus, the mysterious country that is neither Western nor Oriental, Japan has a mission to transmit that.

The "Japan" means the people that studied Japan and have lived in Japan as well as Japanese. Any people of "Japan" can transmit the information. (Japan is an epitome, and it is a leader figure showing a fresh ideal method of mind characteristics and the material civilization of people.)

A system of ideal city, Uni-Earth City spreads around the world as ideal social systems such as world politics, economy, education and law, and art and spirit become cultivated by construction of communities will be handed down in the people's mind and stay the ideal society permanently.

That a theme of the 21st century "lives as a person" is not so complicated. However, in recent years, because of over-segmentalized ologies and over-informatized society, simple things are complexified and we cannot sometimes arrive at an essence.

Thus thin-slicing, the way of thinking is required. (By "Blink," Malcolm Gladwell, correspondent of "NewYorker," "thin-slicing" means that Minimum information sometimes enables us to judge wiser than more, which is impossible when we have more information, and propound "We think subconsciously, and decide by the cumulative experience without mass new information" as a hypothesis. However, he prefaced the thought is not necessity, and merely, that is merely the avail to judge matters.) According to that, we must analyze the problem simply and solve quickly in consideration of the material time limit of the earth, ecocide.

Several groups practice and suggest the lifestyle like "Uni-Earth City" already. Their concepts of 99.999% are the same as that of Uni-Earth City, but the rest, only 0.001% are different from it. One of a difference is that "Uni-Earth City" possesses the system to possessing the structure to solve problems of "selfhood." Another is it has the provision for "Selfhood" to be driven into the natural consequence, and disposed.

If nothing is done, a crisis to fall into the bottom of misfortune may visit it again by problems caused by a corporate strategy, war and worse of international situations, originated by "selfhood." We stand at the crossroads that can right solve the disposal of "selfhood," the proposition that the human has not been able to solve in historical times now.

#### **XIV. Practicable organization**

It is ideal that the country formed with people fusing gradually as before. However, when "selfhood" is formed once, it begins to wish that it wants to continue being "selfhood" forever. That is "a law of selfhood saving," and it is why "selfhood" will not vanish. (There is the target that should be dealt with in a brain of each person.) Therefore, even if selfhood understands necessity to establish "Uni-Earth City," they will never do that.

That is why while we know that it is "good," we cannot assume it "good." The root of various crimes is neither an individual, a politician, a bureaucrat, a company nor a country. All of that comes from selfhood. (We should hate not a person but the root establishing a crime.) The target is self-interest and the root of various crimes, "selfhood" persistently, and we must dispose of all "selfhood."

Of course, common enemies of the human are "selfhood," the common proposition that we must solve. Thus society that we must live as "selfhood," and must continue being as "selfhood" must be reconstructed by demo-mobilization to vanish selfhood. All "Crystal Spirit" must graduates from "selfhood," and recur to developed "Crystal Spirit."

The essence is how many people who have "Crystal Spirit" stronger than "selfhood" there is all over the world. The answer to that question determines whether "Uni-Earth City" can be created.

Participants cannot get necompensation or fame through the project. Is there the person, company and group that do not mind self-sacrifice and participate without pay? (Genuine sightseeing)

Then the disposal of "selfhood" is not possible as "selfhood." That is achieved by returning to only "Crystal Spirit." The strongest "selfhood" we have, the more "Crystal Spirit" stores strength exceeding "selfhood," and presently, it grows that it cannot be unlikely to remain "selfhood." (Growing to an adult)

Therefore, when we know the limit of scholarship, become conscious of the meaning of money and point or purpose of living, noticed that we cannot live genuinely in the modern society, "selfhood" falls into self-contradiction, make a pole shift to "Crystal Spirit," and experience and think as not "selfhood" but "Crystal Spirit." Briefly, "Selfhood" exceeds its critical point, and reaches the arrival point that cannot but choose that we live as a person.

However, it is necessary to completely satisfy "selfhood" to bring up the strong "selfhood" that a pole shifts can be caused, and to that end, it is necessary to practice the ultimate pursuit or simulate it in our brain. That requires the awful

will and stamina and, in the modern civilization, an investment and waste of vast money. In addition, in the modern society, when a new product is made one after another and excessive information is offered to, the earth will be destroyed and we will exhaust before personal desires are satisfied. As a result, spirit of most of us decays while we live in such an environment.

Thus the strong "selfhood" which all people shift to "Crystal Spirit" is formed, and there is not leisure shifting to "Crystal Spirit" as a person for a material of the earth anymore mentally either. (Asking for the moon is unlimited.) Moreover, even though we wake as "Crystal Spirit" and shift to it, if the apple box, social structure is rotten, we will return to "selfhood". (Poisoned by "selfhood")

As that puppy becomes a dog, children of "Crystal Spirit" should originally be born as "Crystal Spirit." If the environment where they grow as "Crystal Spirit" without passing through "selfhood," people are fuss-free to become "Crystal Spirit."

For this reason, "Uni-Earth City," where people born as and grow as "Crystal Spirit.", is needed. Thus, it is necessary for us to generate the drastic method toward complete relief not which all people can help building "Uni-Earth City" all together. (The way to contain "selfhood")

At first, an outlandish idea is required how to express regret at the current world scene and promote building "Uni-Earth City" to the government all over the world.

The idea must not belong to any religious and thought association and existing nations, and must be surely able to request construction of "Uni-Earth City" to governments around the world. (If they belong to something, factional selfhood disturbs fusion certainly)

We are apt to rely on NPO groups, religious groups or thought about groups as a general means, but the opposite is country, "selfhood." Because the organizations are under supervision of countries, they do not have effect at all and they are easily ignored and collapsed by countries.

The organizations also have a problem. Members of the organization listen to an opinion of their captain, but do not listen to others. The organization takes care of only members of it. Those are called "organized selfhood," and it cannot accept responsibility for all the people. Therefore, the organizations cannot realize "Uni-Earth City."

In addition, many religious groups and the United Nations do not have enough quality to construct "Uni-Earth City" because of these reasons.(Religion does not unite with other religion)

Therefore, we have to construct the new nation (government organization) that

has never been before and which exceeds any religion and countries all over the world.

Whereat organization equal to nations that restrains “selfhood” and request to create “Uni-Earth City” is necessary. Its apple box is required to not be built in the rotten apple box but establish a larger apple box that can wrap the apple box. (The biggest apple)

However, it must not participate in a right and money at all, and only aims at requesting to create ideal society, "Uni-Earth City" toward the world government. (If money and a right are affected, "selfhood" occurs) That organization, a nation is the Universe State, the nation of "Crystal Spirit."

The Universe State is the oldest in the history of the universe, and has actually existed before the universe' birth. (The nation that transcended expression ways) However, it was lapsed into obscurity as soon as we forgot "Who am I?"

The aim of "Crystal Spirit" is to make the world, which consists of "object" and "identifier," the original world of "Crystal Spirit," where there is neither distinction nor discrimination.

There may be questions how "Crystal Spirit" creates the government of Universe State, but that is very easy if we review the fountainhead of constitution.

Nations can be built without authorization, application, and public opinion. Whenas they can be suddenly established through people have the will expel adverse people. For instance, Transitional Authority of Iraqi junta in recent years, the US government, and Japan's government. Many cases are carried out by several or dozens of people.

Condition for a country to be organized is to prepare the government, a territory, the nation and a constitution. One day, when the government is established in a nameless place, land or region, a territory, domain is claimed, the people who live there are made the citizens, and constitution is enforced by people who created the government, the nation is created. (Nation is corporation without capital. Hideyoshi Toyotomi said, "One who steals items is thief, but one who steals nations is not.)

After that, collecting tax from ignorant citizens, deciding the way to distribute it by member, binding them by the law through imprinting the notion, what nation is, and making them engross entertainment for them not to think what nation is, the peaceful country will come along. A formation condition of a country creates government and has a territory, and it is the constitutional existence of the nation and enforcement.

The country was originally an organization to assure of life, freedom and fairness

of all people. (The system of Crystal Spirit)

The notion, nation is much superior to other associations such as religious organizations, thinking organizations, and various corporations. Because it can justify that, it is natural for anyone to obey the nation with minimum contradiction. However, if someone abuses the system, ruler-slave relation appears and inequality develops to begin strife. "Selfhood" abused this system. Because nations themselves are "selfhood," systems are entirely selfhood-based and even all of politicians, bureaucrats and citizens are slaves of "selfhood."

"Selfhood" calls nation public, and mentions justice and abidance of convenient interpretation of the nation.

Whereat, "Crystal Spirit" establishes the country after the same method. It deserves natural consequence for "selfhood." If the Universe State is the same as a nation of "selfhood," negation and argument for the Universe State are equal to self-abnegation. (Self-defeating contradiction)

After all, both nation and living as a human being are very simple notion. It is no wonder that the Universe State, which has the widest territory that even contains the earth, where all of the citizen are civil officer, public "Crystal Spirit," and which is governed by the constitution, are suddenly established without application and authorization by "Crystal Spirit."

Moreover, if the mechanism of establishment is similar to present nations, government activities that have been done now will be enabled

If logic is the same, scale of the nation, dimension and habitancy is quite irrelevant. For instance, the Vatican City State passes as one nation though its area is as large as that of Tokyo Disneyland, has the only around 1000 people. In addition, in Britain, there is a nation where dozens of people live. It seems to exist depending on recognition and political background.

If the earth is compared to the Japanese Islands, at most, North America is Hokkaido, the Eurasian Continent is Honshu, the Australian Continent is Shikoku, and the African Continents Kyushu. The present scale of the human is too small, anyway.

The earth is considered to be one country, but it is divided the world to several blocks after having considered climate, and the various system that are based on Uni-Earth City (the government of a unit at the minimum) about basic structure manages them. Then, it becomes Earth Confederation, only one government in the universe, and everyone can be an earthian. All religion, nations and races are included in Earth Confederation and there we try to unit them. It is unification by

"Crystal Spirit." (Unification for liberation)

Those missions are supposed to be done by United Nations. However, even the United Nations is already influenced by "selfhood," they cannot be done by it.

The reason why we cannot integrate is that concrete policy such as the above are not proposed. Even if that necessity is understood, those cannot be executed as long as "selfhood" rules the nation, and eventually, there is no measure but "selfhood" is solved after all. (A seal of "selfhood" requires a decisive factor)

In Japan, regardless of the difference of religion, thought and race, we live there concretely and concretely all together.

It is important to determine the social structure and standard of civilization that everyone can live peacefully and happily and to enable anyone to profit. There is the cause that we cannot execute even if we understand the necessity in national possession by a "selfhood," and there is not means than it still solves a "selfhood."

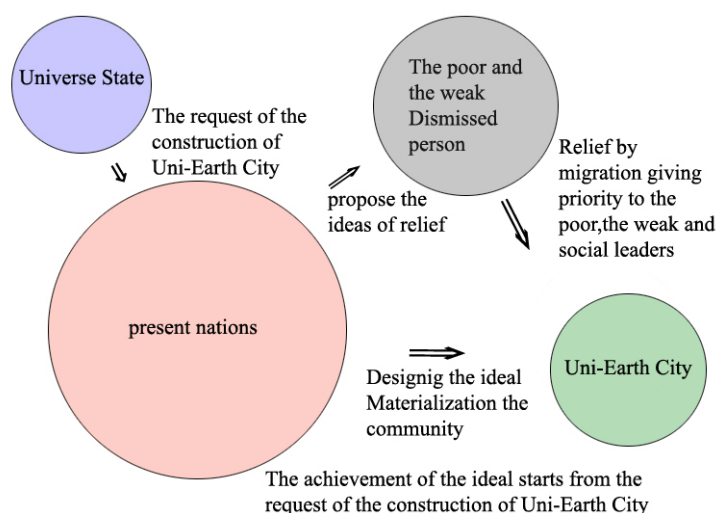

The human has words, and we can talk.

If Earth Confederation will be made by our discussion, we can separate from "selfhood."

Because the Universe State is not a ruler, it does not own all weapon. Thus, there is no compelling force. It is possible for it only to request and conversation, eventually, it has the only way to expect people to act sensibly.

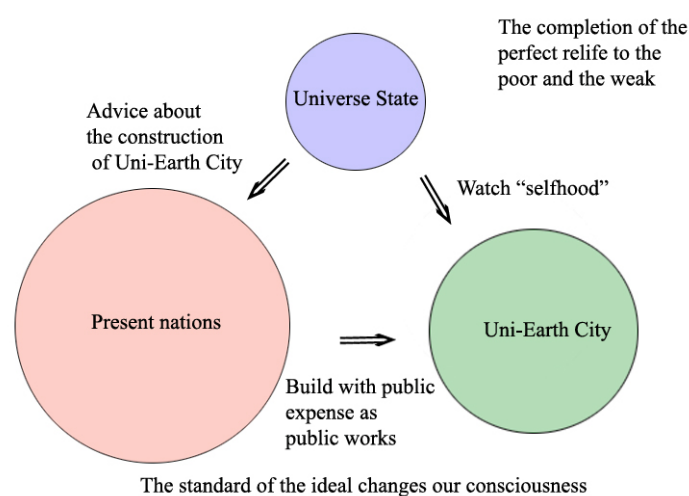

No tax and money are collected at all because the Universe State aims at the society where money does not need.

A civil servant of Universe State is a good-natured citizen of an existing nation. It will not change for them to obey the law, to be punished when they disobey, to pay their taxes, and to support the nation as citizens. In fact, Earth Confederation is created by not the Universe State but the world government persistently.

Thus, they must pay a tax and support so much because each country needs considerable money to build each Uni-Earth City. (The Universe State is a supporting party)

We expect that people live as an earthian in Earth Confederation that countries in the world create by collective effort. The Universe State merely requests the world government to shift to Earth Confederation based on the new ideal. It is vicarious agency of "Crystal Spirit" before Earth Confederation completed. (The Universe State is a supervisor and a coordinator.)

If various countries in the world accept the request of the Universe State, existing nations disband, and new "Earth Confederation" is born. Thereby, world scenes

change drastically.

However, there is one problem that we have to pay attention to.

That is, if Earth Confederation is ruled or possessed by someone, "selfhood" will arise. That state is not different from now at all and as a result, new ruler will be born. (History of rule).

To prevent it, it is needed to dissolve the organization which made Earth Federation and the idea of not producing "Selfhood" is also required. Then we have to systematize politics not to "Selfhood" cannot concern it. If that is achieved, all people get possible to live as earthians in the ideal world.

Unite in the network of Uni-Earth City

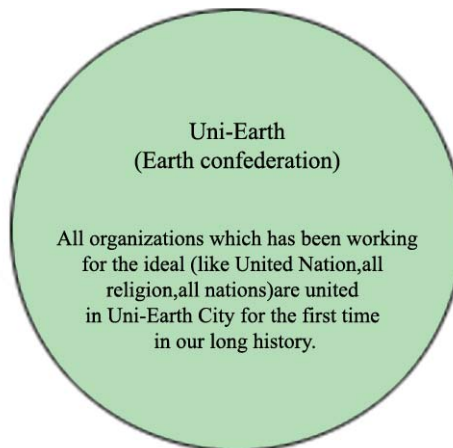

Therefore, the aims of the Universe State are to complete the system where politics, economy, education and information are not possessed by "Selfhood".

When it is done, the Universe State finally finishes the duty. If an ideal country without a ruler, Earth Confederation is complete, vicarious agency, the Universe State of "Crystal Spirit" are dismantled, and at that time, civil servants of the Universe State will be able to become citizens of Earth Confederation.

Because even the Universe State changes into "selfhood" before long if it continues, it must be certainly dismantled eventually. Civil servants of the Universe State are also required the strictness. Thus a goal of the Universe State is for a purpose of construction of Earth Confederation is achieved, and for itself to be dismantled. In addition, the Universe State is completely neutral until Earth Confederation is completed.

Therefore, Earth Confederation is expressed with "Confederation" not "Nation." It is a federation and harmony of people.

It is harmony of people that is "myself," "Crystal Spirit" itself. By fruition of it, the society fair in all continues eternally.

The ideal comes true and everything will be united  
by making of Uni-Earth

The confederation with harmony is the real democracy in a true meaning and that is the Symbionism.

※ Reference: The difference between Earth Confederation and present system

	Present system	Earth Confederation
Founding of a country	Convenient of the ruler	Request by the Universe State
Race • nationality	Japanese, American, etc	Everyone is the Earthian
Nation	Too many	Only one
Constitution and law	Various	Only one
Territory	Decentralization	Whole earth
Rule	Each nations	Government of Earth Confederation
Politics	Politician and bureaucrat	Shift to the system
Principle	Capitalism	Symbionism
Economy	Market economy	Regional autarky
Industrial establishment	Mass production and consumption	Maintenance-based
Money and tax	Too much insist	No tax • Equal work and wealth
Ownership	Nation, company, individual	Earth Confederation
Disparity in wealth	Large(Hierarchy exists)	Almost none

Making Earth Confederation has not completed because of obstruction by "selfhood".

Not all people are "selfhood." For this reason, I wish everyone to notice that we stopped noticing that we are "Crystal Spirit."

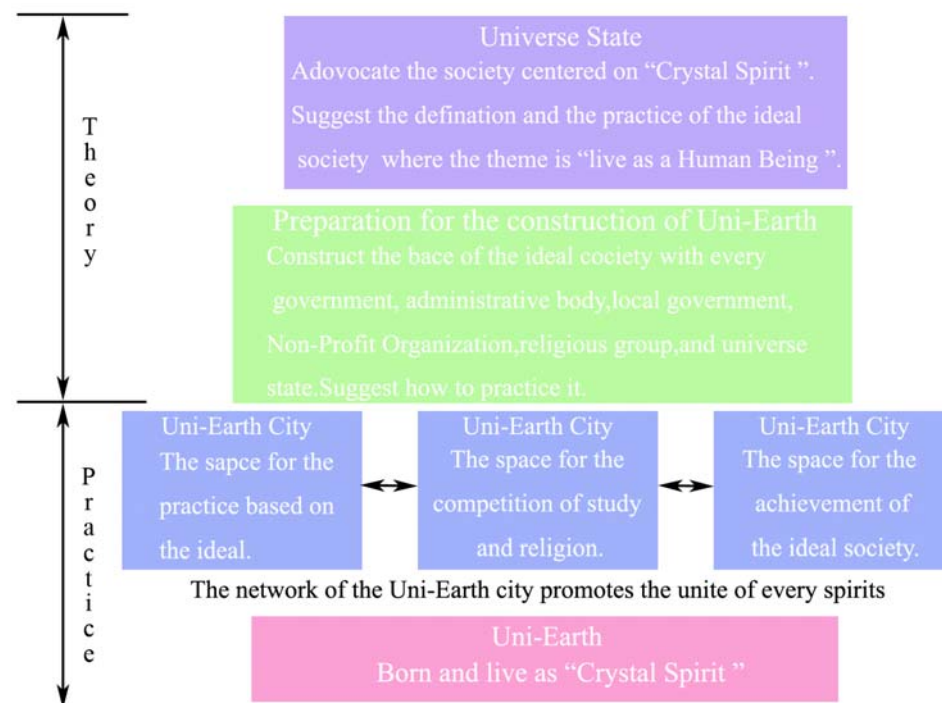

It is required that the Universe State stops "selfhood" around the world and make all people happy through awakening as "Crystal Spirit," integration of the earth, establishment of Earth Confederation.

If one nation on the world was built and there were concrete idea to make impartial society that does not have discrimination and distinction, the current world would be quite different. (The plan of Earth Confederation and the way to make it)

Construction of Earth Confederation promises to create genuine ideal society. If that comes true, hostility on the earth will be exterminated, and anyone will be able to live as an earthian happily and peacefully. (The achievement of absolute peace)

The Universe State does not compel you, but "selfhood" never stops until it learns lesson. It is doomsday when "selfhood" learns lesson next time, irreversible time. It cannot connive that "Crystal Spirit" destroys the earth with "selfhood," and die together.

Being unable to stand by, this is suggested. — "the Universe State asks the world government these. - Build Earth Confederation. Develop it based on Uni-Earth City, which is the base of ideal society. Create the environment where all people can live freely, fairly, happily, peacefully and safely."

If the request remain to be rejected and ignored, citizens also will be ignore a request of nations same as what world, "selfhood" does for the Universe State, "Crystal Spirit," then striding nonpayment of a tax or disregard of a law will be

expected. That is responsibility of "selfhood" which takes over organizations, nations for self-interest. (Natural consequence)

A nation requested a citizen many things until today, and the citizen obeyed them entirely. They will obey as citizens, slaves of the nation controlled by "selfhood" in future.

However, if current social structure continues, it can be expected easily that rich-poor gap spreads more and more. If politics is privatized as capitalism, market economy and idolizing money thought, a public concept as a human being will be extinct come the ultimate survival society without constancy, and life that we were frightened will be forced.

That is, the Privatization with "selfhood" does only activate "selfhood" itself and means our ruin. The nations will drive recklessly by "selfhood" and enterprises will be out of control by "selfhood".

Moreover, the world integration and liberalization with military power and power of the state by "selfhood" makes people to become slave and to be ruled by "selfhood". And also the ruler himself will be under the control by "selfhood" and be the slave soon or later. To the end, either we will be ruined or be orphan in the space eternally as long as we are "selfhood".

In the world of "Selfhood", the weak are tend to be ignored. If a pension is reduced, and burdens of the medical welfare costs increase, and a tax increases, it will be inevitable that repulsion for the nation becomes strong.

As for the citizens in the world, a life maintenance has a risky condition and pursuit of essential freedom and happiness by continuous ecocide, expansion of rich-poor gap, poverty and starvation by concentration of wealth, and increasing of criminal they causes. The government in the world gropes for this breakthrough plan, but there is no bright idea.

Thus a current politics system is directed far from the original purpose and role of government.: the expansion of rich-poor gap, spreading war and starvation, lack of essential freedom and equality about right, money and taxation system, and degradation of the ecocide by market economy and manufacturing industrial structure. (New world order is requested)

In addition, the new government based on a completely fresh principle is necessary to rebuild society mainly on "Crystal Spirit" because the cause mentioned above is "selfhood." (Necessity of a paradigm shift)

In other words, the fresh government where all people can fuse as "Crystal Spirit" must be established and the new Earth Confederation governments where all

people can maintain life fairly, enjoy essential freedom, and live peacefully and happily must be created by "Crystal Spirit."

And this must be executed with all people's agreement and that is a request from the Universe State government and right of the people.

That is requested world nations after showing an example (the model of theories and practice of ideal society to be finally created) of "Uni-Earth City" as the method easily understood and accepted by the world government and sovereign around the world. Thus, misunderstanding will not be surely caused.

## Postscript

There seems little doubt that *raison d'être* of the universe, the earth, and one is asking oneself what the "Crystal Spirit" and answering the way one lives as the genetic conscious and future is going to be.

The aim is not the completion of the individual (1 piece) nor the some groups (1 part) but the completion of the whole Jigsaw puzzle (All people are "Crystal Spirit" but are scattered now)

Briefly, the present world must be completed as "Crystal Spirit", not as "selfhood."

The human has superior civilization power, and by Internet of earth scale, information can be shared almost simultaneously in the 21st century. It is the social climate, "An attempt is sometimes easier than expected." today.

To build Erath Confederation finally is the gargantuan project that is not be able to be done by only individual. Therefore, it is needed to find the answer to "How human beings have to live as ideal", and to play each one's role (project) as a 1 piece

in the puzzle.

That is, it is needed to show everyone the things that are practiced for others at first (example: Ultimate medical treatment, ultimate house, the best water service, etc. Ultimate theory and practice)

However, it must be insufficient for individual, each group, and each organization to complete it. It is necessary for them to act with other person who has the same will as Universe-State while keeping their action. That is, the necessity to propose the project which is executed by individual, each group, and each organization as the way the ideal nation (Earth Confederation) is. In addition, the necessity to make system that is able to make the ideal come true with the foundation of the nation. (Methodology)

There comes the last big chance, if we can create Earth Confederation, which is based on the ideal community "Uni-Earth City", all people can wake up and live as "Crystal Spirit."

If once we wake up as "Crystal Spirit," human being, a purpose to live is achieved, and all problems, contradictions and mysteries will be solved. In addition, the ideal society can continue permanently for all people due to become complete human being, "Crystal Spirit."

For this reason, we should establish Uni-Earth City, where we can live as a human being everywhere without belonging to any nations and any religions, and it is necessary to show standard of living as a human being.

Stereotype restricted by nations, religion and nations in the world is wiped out by showing that. On the earth, only where life inhabits in the large universe, and which shines blue, we can mark an important first step toward creating the world that people live peacefully.

However, before that, it is necessary to ask people whether we wait until the

apple tree rots or we reconstruct the apple box, bring up the apple tree where great apples grow and create the ideal apple box then live with them about creating the new apple box (Uni-Earth City). That is, we need to change our consciousness.

"Crystal Spirit" has bilateral character. One is "conscience," human, another is "wickness," selfhood. We cannot find which is true, the real intention. "The Crystal Spirit" expected to reach the identity. (We learned and experienced enough.)

Whereat, the real intention in all "Crystal Spirit" can be known through asking right or wrong of the establishing Earth Confederation. If they choose the establishment, they are "Conscience," otherwise "Wickness." If "Wickness" is our real identity, we never need to create the universe. Because if it were created, eventually, the end to be ruined would come.

Whereas, if "Conscience" is our real identity, we can part from "Wickness."

Time of the Judgment finally came. "Consciences" or "Wickness?", "human" or "selfhood?" The world vacillates wildly and is divided into two, and then the answer will appear. (Sheep or hircine)

This judgment is the judgment for "Crystal Spirit" itself. Therefore, the judge is each of us, who are its double. So we have to need to ask all the people, "Crystal Spirit".

Generally speaking, the riches cannot approve to reconstruction but that is no matter. Because if the apple tree rots, anyone including riches must suffer.

According to the property of "selfhood," escalation of pursuit of unlimited greed expands rich-poor gap, and riches will be exhausted because they fall among or conflict each other to be wealthier. (Monopoly is not permitted in the society of "Selfhood".)

If many people really choose the reconstruction, it is necessary for us to start to build the new fresh apple box immediately. Conversely many people does not choose the reconstruction, they may expect to remain even if an apple rots. That induces they connive at ecocide, nuclear armaments, combats, and increase of crime. Thus, that means resignation for apology of "selfhood." In that case, the person who violated the criminal and the war is not guiltiness. The guilty is in ourselves who leave the apple box as it is.

Even if no matter how much sophism and idealism such as the bright future, clean or ecology are told and global environment protection activity and an anti-war movement are executed, they will be meaningless at all as long as the action to build Earth Confederation is not taken.

If the numbers of the people who wish to keep the present world as it is are so

many, we will rot the apple tree with many selfish apples because the flow of the world changes toward the way many consciousness intend to.

That requires examination of the way to win a place in the ultimate selfish society, and national reinforcement of security and defensiveness will be emphasized.

We must not make light of "selfhood." Each of us must also wrestle with a way of self-defense seriously. Moreover, we must provide the way to savor carouse in rest time. (Security of overrunning of egotistical liberalism and security only of oneself)

Is that all right with you?

Nobody should expect such things. For this reason, we do not live as "selfhood" in the world of polite face, we should create the world where there are not hesitation, pretenses and lie and live together.

Now, when the practical method to change the world, we are expect that change our own spirit (consciousness), and show our intention in terms not as "selfhood," but as "Crystal Spirit" - "How do we live?", "How would we like to do with the society?", "How should the earth be changed?" And we are expected to assemble, discuss, consolidate together with comrade, and transmit the request of "Making of Uni-Earth" to the government, economic quarters, and various people all over the world, then create the Earth Confederation in world governments.

I want you to participate and make this project known by your own intention because this project is something like a message game. However, it is undesirable for the project to become different from the original or to become misunderstandings. In order to avoid such a case, this content is also available as a PDF file at the homepage. (<http://universe-state.com>)

It is no problem to copy or translate this book as it has no author and no copyright. (Please refrain from the falsification and sales of the text.)

I want you to request "Making of Uni-Earth, the construction of Earth Confederation" to all over the world together with the people who has the same will (It does not matter if you try it only by yourself, as the important thing is to understand and to act. To change the world is completed by not making your mate but by the message to the people all over the world.)

I think Japan (Japanese government) must play the role as Universe State, the coordinator of the world because everything is available in Japan.(Become conductor)

When the number of Crystal Spirit reached a critical point while consciousness changes to "Crystal Spirit" individual by individual, all people transform themselves from "selfhood" into "Crystal Spirit."

Everything starts from “To help the people all over the world as the civil servant of Universe State, “Crystal Spirit” with the boast and the sense of responsibility.”

Because it means, “to live as “Crystal Spirit”....

It is present nations or ourselves that choose how we live in future. The theme that "Crystal Spirit" bet on the last chance in the 21st century, that is to "live as a person, Crystal Spirit".

Universe State Government

## The Universe State charter

Harmony consist of symbiosis,  
and harmony is considered as the most valuable.

- I. **Sharing of all rights** — All rights and all responsibility should be shared, and that is considered as fairness.
- II. **Sharing of all creation** — Everything except the human body should be shared, and fair distribution is fundamental principle
- III. **Relief of people** — Blissfulness is achieved by complete relief of refugees. (HELP: Health, Equal, Love, Peace)
- IV. **The unified nation on the earth, Earth Confederation should be purposed, and the other countries must not be established afterward.**
- V. **Any weapons must not be produced.**
- VI. **We should acquire self-awareness and self-respect as "Crystal Spirit"; Praying happiness and peace and feeling grateful for all people leads to respecting "Crystal Spirit."**

The founding of Universe State (the nation of “Crystal Spirit”) is informed at October 1, 2003, to relieve everything completely.

U.E.C.
